

ZEVERSOLAR WIFI PASSWORD CHANGE

Dear Customer,

We recommend you change the WiFi password on the following products' Access Point to enable highest security:

Zevelution 1000S/ 1500S/ 2000S/ 3000S, Zevelution 3680/ 4000/ 5000, Evershine TLC4000-10000 with WiFi and ZeverCom WiFi. If your product is not equipped with WiFi, the below instruction does not apply.

Step 0: Please ensure that you are physically within the Zeversolar device's WiFi network range.

Step 1: Connect to the WiFi network **ZEVERSOLAR-XXXX** on your laptop or cell phone (see fig. 1) "XXXX" is a four digit number.

Fig.4 Change to secure password

Step 2 Enter **zeversolar** as the password and click 'Connect' (see fig. 2).

Step 3 Enter **160.190.0.1** into your web browser's address bar to connect to the Zeversolar device's webserver. Then navigate to the **Wireless** tab and scroll down (see fig. 3).

Step 4 Click 'Set' in the 'Device Wireless setting' section (fig. 3). Please set a new secure password in the pop-up window (fig. 4). You may want to change the Zeversolar device's network name (SSID) as well. Please note that these settings do not affect any potential WiFi connection to your router's network. Finally confirm your changes by clicking 'OK'.
